

Paragraphs—II

33.

Islam: a Religion of Peace اسلام: ایک امن پسند دین

Islam is the fastest increasing and spreading religion in this world for its message of peace. It has always been criticized by other religions that it was spread by the force and bloodshed of the sword. In fact, if we look at the meaning of Islam, we will know that this word is derived from the Arabic root words "silm" and "salam". It means peace, obedience, and submission to the will of Allah. So, Islam ultimately calls for peace; be peaceful and let others in peace.

"Islam teaches peace and not violence." (Pervez Musharraf)

But the problem lies with other religions which are not ready to accept the message of peace by Islam. Their top religious clerics consider Islam the biggest threat for the survival of their own religions. All big religions such as Christianity, Hinduism, Judaism and Buddhism are working against it because they are well aware of Islam's final success before the end of this world. The proof of Islam's peaceful approach is visible in the different parts of the world. In Palestine, Kashmir and many other parts of the world, only Muslims are being victimized by other religious powers. Nowhere in this world, Muslims are so powerful that they may victimize other religious people. If they once or twice tried to threaten or launched a war to demand their due place and rights, they were brutally terrorized and crushed down with the heavy military attack such as in the Arab-Israel War and the Afghanistan-America War. To sum it up, Islam is a religion of peace.

"For the most part, Islam is about peace." (Ghostface Killah)

Other religions without any reason involve it in some kind of war-like situation in different parts of the world just because of its fastest growth.

34.

The Role of a Teacher as a Nation Builder استاد کا کردار بطور معمار قوم

A teacher is one who teaches students in a way to be a constructive part of their nation. The role of a teacher in this regard

is very significant and decisive at the time of a sudden terrible situation in the country.

"I am indebted to my father for living, but to my teacher for living well." (Alexander the Great)

Nations keep on passing through the different ups and downs in their process of evolutionary growth. They live in the time of peace, they live in the time of war and they live in the time where they are confused about which side of the situation they should stand. In all such situations, it is the role of a teacher to prepare and train the young generation to do its constructive part in the hour of need. A teacher strengthening the moral character of students paves the way for a better society in which everyone should take care of others.

"One good teacher in a lifetime may sometimes change a delinquent into a solid citizen." (Philip Wylie)

A teacher also tries to uplift the nation to the point of zenith by imparting science knowledge to the students. In such a way, students can raise the status of the nation by performing innovative experiments and inventing the latest machines and technologies in the field of science and technology. There is only one way to build a strong nation and that is to invest more and more in your students through science and technology education. A science teacher will produce productive products in the field of science and technology through students to cope with the future challenges. And an arts teacher will produce students who will be able to help their scientists by the invention of a true philosophy of life. To conclude this discussion, I would say a true nation is built by a teacher who polishes the raw material in the form of students and makes them able to contribute their nation in every walk of life positively.

35.

Islamophobia اسلام مخالفت، نفرت، ڈر

/ɪz.læm.əˈfəʊ.bi.ə/, /ɪz.læm.əˈfoʊ.bi.ə/ [U. Noun]

Islamophobia is a term that has been in use in the recent past especially as a propaganda term against Islam. It is used for unreasonable dislike or fear of, and prejudice against, Muslims or Islam.

"Islamophobia is a word created by fascists, and used by cowards, to manipulate morons." (Christopher Hitchens)

Since the 9/11 attacks on the twin towers in New York, there has been an increase in Islamophobia and racist abuse in several countries like America, England, France, the Scandinavian countries

etc. These countries put allegations on the Afghan Government of Taliban and blamed them to be the mastermind of the 9/11 attacks on New York, America. After that incident wherever a bomb was exploded, wherever a rocket was launched and wherever atrocities were perpetrated, only Muslims were blamed for that and put on the hit list of the security forces.

"No one is as murderously 'Islamophobic' as Islamists are." (Nick Cohen)

No one sees the atrocities of Israelis and Hindus in Palestine and Kashmir respectively. No one calls them with such disgraceful terms like Hinduphobia or Jewish Phobia. To sum it up, there is no truth in this propaganda that Islam is the detestable religion. Islam is in true spirit a peaceful religion and wants peace everywhere in the world. So, let's shun this practice of calling the Islamophobia term.

36.

The Importance of Time Management for Students

طلباء کیلئے وقت کے انتظام کی اہمیت

The most important thing for students is the management of time according to their tough schedule of studies. Students must remember this literary saying:

"Time and tide wait for no man."

Students must be very careful in spending time. They should make a proper time schedule for whatever they want to do daily. A student thinks about his interests first of all and then he makes a time schedule. Generally, a day is divided into three parts of eight hours. Eight hours for work, eight hours for leisure activities or enjoyment and eight hours for sound sleep. So, a student must, at least, keep in mind this division of 24 hours. Exceptional and extraordinary students utilize the eight hours of leisure activities. They make use of these eight hours in their studies and accumulate more time. The average students who spend their leisure time in different activities of enjoyment have less time in this way. If you have set a goal in your advanced level of studies then you can use 16 hours in your preparation for the different courses of your studies. But suppose you have interest in sports activities, you can utilize your leisure time while practicing and playing your favorite sports and games. To conclude, the best practice by students should be the use of a balanced approach. There must be a balance between your studies and sports. If you don't pay attention to sports and games, you may not feel good and find yourself active. A famous maxim in this regard is:

"A sound body has a sound mind." (Thales)

Therefore, you must manage your time wisely keeping in mind your future plans.

37.

Money/Currency Devaluation and Economy روپے کی گراؤت اور معیشت

Money/Currency Devaluation and Economy are interdependent on each other across the world and especially in Pakistan. Both can affect each other if there is a problem with either of them. If there is a problem with your country's monetary policy, it will affect the currency first and then the poor middle class.

"When monetary policy destroys the currency, it always destroys the middle class." (Ron Paul)

Let's understand the basics of these two terms. Money devaluation is a reduction in the value of the currency of one country when it is exchanged for the currency of another country. On the other hand, economy is the relationship between production, trade and the supply of money in a particular country or region. So, the economy of a country totally depends on the production, trade and the supply of money. The world economy is still suffering from the effects of the different ups and downs. Over the past few years, Pakistan's economy has gone down at a record pace. Our country's economy is in recession and the reason is that there has been a continuous devaluation of Pakistani currency against the dollar. It is one way to destroy Pakistan and its capitalist system.

"The best way to destroy the capitalist system is to debauch the currency." (Vladimir Lenin)

Tourism is one of the most important factors that dominates the local economy. If tourism is promoted to the international level, it can boost Pakistan's economy. The reason is dollars will come with the foreign tourists and this will strengthen Pakistan's currency and will save further money devaluation in the country. Then we will also see tax cuts to stimulate the country's economy. Pakistan was one of the fastest-growing economies in South Asia in the 1960s. To revive Pakistan's economy once again, we need to strengthen our currency in order to stop further money devaluation.

38.

Sports and Education کھیلیں اور تعلیم

Sports and Education go parallel to each other in the youth, especially students. Sports and Education are both very important for the physical and mental health of students. Sports and games

help students a lot in their growth of bones and muscles. They remain fit and do their school and household work with peace of mind.

"A sound body has a sound mind." (Thales)

It's a well-known saying that points out the worth of a healthy body. The youth not only become mentally and physically fit by participating in sports and games but also become professional players as well.

"All work and no play makes Jack a dull boy." (Proverb)

They can bring respect and repute not only for themselves but also for the country. Education in the 21st century is one of those most important things which are considered very vital for the betterment and welfare of any society. Every religion of the world gives emphasis on getting education. Islam gives much more importance to education as compared to other religions. The first ever lesson given to Muhammad (SAW) in the Holy Koran was about education.

"Read in the name of Your Lord Who created."

The Holy Koran says:

"Are those who have knowledge equal to those who do not have knowledge?" (39:9)

Similarly, our last Prophet Muhammad (SAW) talked about the importance of education in these ways on different occasions:

"To get education is the obligation of every Muslim - male or female."

"Seek knowledge from the cradle to the grave."

"Seek knowledge even if you have to go to China."

In the light of the above discussion, it is very much clear that sports and education are equally important for the youth and students.

39.

Etiquettes آداب

/¹et.i.kets//¹etikət//¹et_.i.kits/ [U. Noun]

Etiquettes are the formal rules or customs of correct or polite or accepted behavior in particular social groups or social situations. If we follow them, we are considered civilized; if we don't follow them, we are called uncivilized.

"I think the problem today is that there is no social etiquette."

(Phoebe Dynevor)

Here are some bits of advice on etiquette that can be very useful for you in particular social groups or social situations. For

example, social etiquette dictates men not to sit while women or elderly people are standing. Diplomatic etiquette forbids calling for the death of a national leader. We should not breach etiquette by not informing our superiors of our decisions. Some people show their contempt for the social etiquette of not wearing a tie where it is necessary. It is poor etiquette to invite people to a party and then cancel it just a few hours before. Etiquette requires that the bride should avoid unnecessary talk on her wedding day. If you don't know the etiquettes required for particular social groups or social situations, you need to know them before experiencing it.

"I didn't get etiquette classes, which is a shame because someone like me needs them." (Claudia Jessie)

We must try to know medical, legal and professional etiquettes. Students must know the correct etiquette of asking a question from the teachers. We need to know cell phone etiquette. We should know about tweeting etiquette from some guide. Your email etiquette should be very good. We should know how to address religious clerics according to the rules of etiquette. A lawyer knows the correct etiquette of addressing a judge. Some people are real sticklers for etiquette, so you'd better ask their advice to be successful in some social situation.

40.

Healthcare طبي علاج

/ˈhelθ.keər//ˈhelθ.ker/ [U. Noun]

"Healthcare is the cornerstone of the socialist state. It is the crown jewel of the welfare state." (Monica Crowley)

Healthcare is the activity or business of providing medical services to the patients suffering from different diseases. It must be provided freely by the welfare state. People in poor countries cannot afford healthcare privately. In such countries, large corporations should come forward and have some responsibility in providing healthcare to the people. In third world countries, voters demand healthcare facilities but politicians cheat them by introducing some reforms on their political agenda. They satisfy their voters by launching a healthcare system or service. The healthcare benefits provided by the state are no doubt a great blessing for the people. On the other hand, the high costs and expenses of private healthcare are out of the reach of the people. In the private sector, healthcare has become an industry that runs on the exploitation of the people. Private healthcare company is just like an East India Company that had nothing to do with the misery of the Indian people except to

collect a huge amount of money from its business. Healthcare providers must try to provide free healthcare to the people. In this regard, the NHS is a world-leading healthcare system free at the point of need to everyone. In this regard Deb Haaland says,

"Healthcare is a human right. No one should face bankruptcy or death because of lack of healthcare." (Deb Haaland)

The costs of healthcare for the elderly people at least must be totally free in the community healthcare system. Above all, the healthcare workers and professionals should be respected widely without any narrow-mindedness.

41.

Social Justice سماجی انصاف

/ˌsəʊ.ʃəl ˈdʒʌs.tɪs/ /ˌsoʊ.ʃəl ˈdʒʌs.tɪs/ [U. Noun]

Social Justice means that all people should have the same rights and opportunities and that a country's wealth and resources should benefit everyone in that country. It is the biggest challenge for any country or society, especially third world countries like Pakistan.

"Striving for social justice is the most valuable thing to do in life."
(Albert Einstein)

In Pakistan, there are different organizations working for the rights of the citizens. But the non-government organizations (NGOs) are comparatively doing better than the government organizations. They are really great campaigners for social justice in Pakistan. They believe that the current policy means that individual self-interest always takes precedence over social justice. So, they continue to fight for social justice in their class-divided homeland.

"Social justice cannot be attained by violence. Violence kills what it intends to create." (Pope John Paul II)

A certain leader is seen as a crusader for social justice against the current corrupt political establishment. The Government upholds the values of social justice and has worked hard to improve services for the poor people. It sees taxation as an instrument of social justice, a way to redistribute wealth.

42.

Violence تشدد

/ˈvaɪ.ələns/ [U. Noun]

Violence refers to the violent behavior that is intended to hurt or kill somebody. It has always been a tool used for getting results of

your own choice. Throughout the history of mankind, we have seen it in different forms in different parts of this world. For this, a special group of people has always been doing fascist activities such as killings to maneuver things in their favor. Currently this task has been handed over to the police and army. They do not think of this killing as an act of violence. They consider it legal under the umbrella of the law and constitution of the country. The protesters' use of violence against the police has also been seen in various parts of the world.

"Social justice cannot be attained by violence. Violence kills what it intends to create." (Pope John Paul II)

Violence recently erupted between police and demonstrators in Pakistan. Violence broke out inside the cantonment area recently in our country. Observers have warned that the violence could escalate into armed conflict and that's what exactly happened in the country. In that political violence hundreds of people were killed in just one day. Then the demonstration was marred by violence too. The enthusiasm of the protest spilled over into violence and brought difficulties for the most popular party of the country.

"Nothing good ever comes of violence." (Martin Luther)

Then the leader of the most popular party called for an end to the violence after his release from the police-custody. At the time of their popular leader's arrest, the people believed their only choice was to resort to violence. The police braced themselves for the outbreak of violence. Troops were called in to quell the violence but violence perpetrated by the army brought the country into the new situation.

"Propaganda is to a democracy what violence is to a dictatorship." (William Blum)

There are fears of fresh violence if the situation gets worsened. Some leaders of the religious parties also used religion to justify violence for the rival party. UN peacekeepers are struggling to contain the escalating violence in Pakistan. But we should remember that under no circumstances should police use violence against protesters. We need to bring an end to the deadly violence in the country. The men of violence who start fights and wars are hated forever.

43.

Domestic Violence گھریلو تشدد

/dəˈmes.tɪk ˈvaɪ.əl.əns/ [U. Noun]

Domestic violence is a type of violence between the members of a family that leaves people under terrible havoc. They start living

under a constant threat of violence. Different organizations work with victims of such violence. The NGOs raise such questions: Why do they always have to resort to violence? The answer to this question is given by Isaac Asimov:

"Violence is the last refuge of the incompetent." (Isaac Asimov)

Is there any relation between the violence on TV and the violence at home? The husbands are often threatening violence against their wives. Children who witness violence between parents often develop problems. Parents shouldn't buy toys for their children that glorify violence. Another reason for domestic violence is hatred that breeds among family members. Sometimes a spouse has a short temper and is prone to outbursts of violence. In spite of sporadic domestic violence, many people have lost their lives. It is said that death is predictable for a man who had lived a life of violence. Women have suffered years of violence and abuse across the world. Domestic violence is the outcome of TV violence that threatens the health and welfare of young people. Many emails are reported complaining about the gratuitous violence at home.

"Deliberate violence is more to be quenched than a fire."

(Heraclitus)

We are all capable of violence in certain circumstances. We have to make people realize that violence only begets more violence. The question is what a refuge there is for victims of domestic violence. A new wave of domestic violence is in the form of violence against a woman by a woman. Violence among boys or brothers at home is also a common problem. Another outcome of domestic violence is that people have started inflicting violence on their domestic animals. Even the sports, especially Football and Cricket are also causing violence among their supporters. We all should attempt to rescue the country from every kind of domestic violence that has taken the form of an endemic violence within the family.

44.

Poultry Farming مرغیاں پالنا

/¹pəʊl.tri ¹fɑ:.mɪn//¹pəʊl.tri ¹fɑ:r.mɪn/ [U. Noun]

Poultry means chickens, ducks and geese and poultry farming refers to keeping and rearing chickens, ducks and geese for their meat or eggs. It has become a business or activity of raising poultry on a farm. To keep poultry is not as easy a task as you may think. Rearing of poultry and other pet animals like rabbits in the garden demands proper attention and time for their nurturing and

nourishment. However, the benefit of poultry farming is that we can eat plenty of fresh meat and eggs daily.

***"The more meat and dairy and poultry we ate, the healthier we'd be."* (Mark Bittman)**

A cold drink goes well with poultry and fish dishes. In Pakistan, people employed in farming account for a minor percentage of the country's population. But there is a problem that modern farming methods have led to the destruction of many wildlife habitats. The country's farming industry was once thrown into crisis by the outbreak of foot and mouth disease. The business of managing or working on a farm has become a tremendous ordeal. Before taking up poultry farming, you should think twice. Sheep, fish, and salmon farming are also just like poultry farming for which you will have to bother for many things. If you go for this business, remember modern farming methods come first on the agenda.

***"The meat and poultry industries are outstanding industries, and it's going to be a very natural fit for me."* (Mike Johanns)**

You will have to be a member of a farming community to be successful in farming, especially poultry farming. A popular leader of Pakistan once urged people to raise poultry at their homes and the result was that many people started living by basic small-scale poultry farming. To sum up, poultry farming is not a bad idea but it demands a lot of care and time. We can very easily understand the decline of traditional family farming at homes because everyone has the shortage of time in the 21st century of revolutionary scientific changes that have taken place around us.

45.

The Uses and Abuses of Smartphones

جدید موبائلوں کے اچھے اور برے استعمالات

Smartphones have become a part and parcel of a modern man's life in which they not only influence people positively but also negatively because of their uses and abuses. When we talk about the uses and abuses of something, we mean the good and bad uses of that very thing. Everything may be used in a good or bad way because it all depends on the person who is controlling and using it.

***"Our mobile devices are so powerful that they don't just change what we do, they're changing who we are."* (Sherry Turkle)**

We can rather say that man's mind decides the use and the abuse of something and so is the case of smartphones. Let's discuss some uses and abuses of smartphones. The first use of smartphones is their basic function of connecting people to communicate with

one another. People communicate with one another not only by the conversation, but also try to communicate with someone ~~without~~ by sending written messages when they are offline. Many ~~many~~ apps, such as WhatsApp, used in smartphones are very popular for any kind of communication. The second use of smartphones is to use them as a tool that can solve any problem seeking information. You can know anything from your smartphones that provide you the search engines like Google, Firefox etc. You can access information of any kind on these search engines. The third use of smartphones is to use them for education and learning. Many educational apps are available in your smartphones to learn and understand. Dictionary apps help a lot of language students in this regard. The fourth use of smartphones is to use them for online shopping. Now you don't need to go to the bazaar to buy something. You can buy whatever you want online while remaining at your home. The fifth use of smartphones is to entertain and enjoy yourselves. You can watch and listen to songs and movies of your own choice on different apps like YouTube. The first abuse of smartphones is to watch and listen to the nude content, songs, films, video clips etc. The second abuse of smartphones is to deceive, cheat and dodge innocent people to make them fool by getting their secret information in the form of some important passwords and codes which are required for transferring money. This bad act is done by the consent of the person cheated. The third abuse of smartphones is to rob or destroy someone's personal data or secret passcodes etc. by hacking.

"Our mobile phones have become the greatest spy on the planet."

(John McAfee)

It is an act of serious concern because it is done secretly without taking consent of the person robbed. The fourth abuse of smartphones is its excessive use for a longer time that can affect your health, especially your eyesight and nervous system. The fifth abuse of smartphones is to record someone's audio and video secretly with the help of the camera facility provided in smartphones and relevant apps.

46.

Knowledge is Power. - علم طاقت ہے۔

Since the beginning of life on this planet earth, man has been realizing billions of times the real manifestation of this saying "Knowledge is Power". When we talk about power, it is actually sensed in different meanings and perspectives of power in terms of the specific situation in a specific time period or age or era.

Our knowledge begins with the senses, proceeds then to the understanding, and ends with reason. There is nothing higher than reason." (Immanuel Kant)

Generally, when we say that knowledge is power, power means wisdom, understanding, inspiration, a certain advantage over somebody or even an authority gained as a product or output of knowledge.

"Knowledge is power. Information is liberating. Education is the premise of progress, in every society, in every family." (Kofi Annan)

Knowledge gives you the moral power of doing justice and taking the right side while solving an issue. Knowledge provides you the power of confidence when you set up a kind of business and share it with your employees. Knowledge develops the power of respect. A knowledgeable or literate person gives respect to human beings without any discrimination on the basis of color, creed, race or rank. Through knowledge we get not only material wealth, but also spiritual peace. Today no respectable profession can be adopted without gaining knowledge. Knowledge is such wealth that nobody can steal it. A knowledgeable or learned man is respected wherever he goes. After gaining knowledge, man can cause the betterment of himself, his society and nation. Without knowledge, no man can recognize even his own self and, hence all his life, he remains ignorant of his purpose of living. Therefore, we should devote all our energies to the attainment of knowledge.

47.

Mobile Addiction موبائل کی لت

Mobile Addiction is the biggest concern of today's children, youth and old people. The biggest cause of mobile addiction is its multidimensional usage in different age brackets.

"The mobile phone is used from when you get up in the morning and is often the last thing you interact with at night."

(Jan Chipchase)

Children become addicts of the mobile just because of the YouTube app which is their favourite for entertainment and enjoyment. They start watching cartoons on it and this activity goes on until the battery of the mobile expires. In youth, boys and girls love playing different games like PUBG, Candy Crush, etc. They also watch and listen to songs and movies continuously for longer times. They also spend a lot of time on different other apps such as Tik Tok, Instagram and Facebook. They also spend a lot of time on mobiles.

for seeking information on the search engines like Google, Firefox etc. They also spend time on mobiles for their education and learning through many educational apps available on smartphones. Girls spend a long time on smartphones to see jewellery, clothes, shoes and other beauty products to buy them online or physically by going to the bazaar. The old people make themselves addicts of mobiles because of the lack of any kind of activity.

***"It used to be that we imagined that our mobile phones would be for us to talk to each other. Now, our mobile phones are there to talk to us."* (Sherry Turkle)**

They have much free time to pass and their only companion in such an old age is a smart mobile. So, they use it for listening to and watching religious content. They also spend time on Twitter and Facebook for keeping themselves updated about different kinds of information about the country, politics and their friends. This mobile addiction has created so many problems related to social, marital and health issues. Its excessive use for longer time can affect your health, especially your eyesight and nervous system so don't become prey to mobile addiction.

48.

The Northern Areas of Pakistan پاکستان کے شمالی علاقہ جات

The Northern areas of Pakistan are one of the world famous beautiful landscapes in this world on the planet earth. These areas are attractive, mesmerizing and fascinating for their lush green fairy meadows surrounded by some of the world's highest mountain ranges, the Karakoram, the Himalaya and the Hindu Kush.

"On earth there is no heaven, but there are pieces of it."

(Jules Renard)

When we start traveling towards the northern areas of Pakistan, we will notice that the mountains will start appearing from the area of Jhelum. The mountains of Jhelum District are mostly dry and salty. The salt range in this area is one of the biggest salt ranges in the world and it attracts millions of tourists every year.

"The violets in the mountains have broken the rocks."

(Tennessee Williams)

The real beauty of mountains is seen when we leave Rawalpindi and Islamabad heading towards the northern areas of Pakistan. From Bala Kot moving ahead, we travel on a dangerous and curvaceous road. On the left side along that road, the water of the river Kunhar meanders through different beautiful valleys and

A PARADISE OF VALLEYS ON THE HINDU KUSH

resonate at its fastest pace with its lightening sound. And on the right side along that road, an unending range of the steadily rising mountains goes on constantly and continuously. The Kaghan Valley on that route is the next beautiful place to stay. Near it there is a mesmerizing spot named Gul Paze which is famous for its lush green hilly meadows.

"Nothing makes me so happy as to observe nature and to point what I see." (Hemi Rousseau)

Then comes the beautiful place Naran on the same route. From there the tourists hire jeeps to reach the most attractive spot of that area which is known by the name of Lake Saif-ul Muluk. It is located at the northern end of the Kaghan Valley, near the town of Naran in Saif-ul Muluk National Park at an elevation of 3,224m above sea level. It is one of the highest lakes in Pakistan. Its greenish water makes it a stunning natural beauty. The highest point of the Kaghan Valley is Babusar Top that can easily be accessed by cars. Babusar Pass or Babusar Top is a mountain pass at the north of the 150 km long Kaghan Valley, connecting it via the Thak Nala with Chilas on the Karakoram Highway. The Kalash Valley is in the Chitral District in the northern areas of Pakistan. Different other valleys of the Chitral District are collectively called the Kalasha valleys and they are surrounded by the Hindu Kush mountain range. Another mesmerizing place to visit is the Naltar Valley situated about 34 km (21 miles) from the city of Gilgit in Gilgit-Baltistan. It is a forested region known for its dramatic mountain scenery and for its three lakes: Satrangi Lake, Blue Lake and Bodlok Lake. The Swat Valley is a stunning and famous tourist destination located in the upper north region of the KPK. It is known as the Switzerland of Pakistan and has one of the oldest civilizations in history. The Kalam Valley is part of the famous Swat Valley. From Mingora, the main city of Swat Valley, you have to travel nearly 100 km further northward. The whole valley from Mingora onward till Kalam is literally paradise on earth at an altitude of 2,000 meters.

"My soul can find no staircase to Heaven unless it be through Earth's loveliness." (Michelangelo)

Kalam Valley is surrounded by snow capped mountains, lush green forests, and numerous streams of clear water. Nearly 40 km from Saidu Sharif in the Swat Valley, Malam Jabba is Swat's famous hill station and ski resort in the Hindu Kush mountain range. It is located at an elevation of 2,804 meters (9,199 ft) in Khyber Pakhtunkhwa. The Malam Jabba ski resort area is at a distance of 45 km (28 miles) from Mingora. There are many more such beautiful

spots in the northern areas of Pakistan. You must try to visit them at least once in your lifetime.

49.

Democracy: Parliamentary or Presidential System?

دیموکری: پارلیمینٹری یا ریڈیوشنل سسٹم؟

"Democracy is indispensable to socialism." (Vladimir Lenin)

The system of government in most of the countries in the world is either run by the parliamentary or the presidential system. Both ways are very popular in the world.

"Democracy is the road to socialism." (Karl Marx)

In the parliamentary system of government, the public elects a specific number of candidates as MNAs and MPAs for a specific number of years to discuss and solve the public issues in the upper and the lower houses called respectively the National Assembly and the Senate in Pakistan. The Prime Minister is all in all and has the ultimate powers to take decisions in the parliamentary system of government. In this system of government, people elect their representatives from the constituencies of their own cities or villages. In the presidential system of government, the people of a country elect one candidate as their President from a few contestants for a specific number of years to manage, control and solve the public issues in the upper and the lower houses. The President is all in all and has the ultimate powers to take decisions in the presidential system of government. In this system of government, the President of the country appoints the competent technocrats, successful businessmen, veterans from sports and forces as his counselors and members of the counsel formed by the President. Four of the five Veto Power Countries, America, China, France and Russia have the presidential system of the government and they are among the biggest or top economies in the world. Only one Veto Power Country, England but many other advanced European countries are being run successfully by the parliamentary system of government. To conclude, it is said that the presidential system of government has an upper hand to some extent.

50.

Dictatorship آمریت

/dɪk'teɪ.tə.ʃɪp/, /dɪk'teɪ.tər.ʃɪp/

Dictatorship is generally an unlawful cruel rule of exploitation and oppression by a dictator or despot (generally a military general)

292

over a country or territory. In today's world, dictatorship commonly emerges as a result of an unlawful act of usurping democratically elected representatives in a country. Dictatorship is certainly established by military dictatorial generals.

"Military dictatorship is born from the power of the gun, and so it undermines the concept of the rule of law and gives birth to a culture of might, a culture of weapons, violence and intolerance."

(Benazir Bhutto)

Sometimes we see some democratically elected representatives launching the fascist dictatorship and ruling masses like dictators. Pakistani masses have lived under different phases of dictatorship in Pakistan. Under dictatorship, atrocities take place without any serious reason. Civil rights are absolutely violated under dictatorship. The freedom of speech is suppressed by the fascist dictators under dictatorship.

"When there is oppression and dictatorship, by not speaking out, we lose our dignity." (Asma Jahangir)

Civil departments are controlled and managed by the military personnels with strict rules and regulations. The Supreme Court and other courts are influenced and dictated under dictatorship. To sum up, almost all of the departments are influenced and affected by the fascist dictatorship. Above all, people don't feel completely free and fear to do anything on their own.

Pakistan's Top Five Peaks پاکستان کی بلند ترین چوٹیاں

Or

Pakistan: a Land of Mountains پاکستان: پہاڑوں کی ایک سرزمین

"Mountains are the beginning and the end of all natural scenery."

(John Ruskin)

Pakistan is a country blessed with a huge number of high mountains. There are five eight thousander mountains including K2, the second highest mountain in the world. Mountains over 7000 meters above sea level are over 100 in Pakistan. Top five highest mountains in Pakistan are K2, Nanga Parbat, Gasherbrum-I, Broad peak and Gasherbrum-II. K2, the second highest mountain in the world, is called Mountain Killer. Its altitude is 8611 m / 28251 ft. It is

located in the heart of the Karakoram range on the Pakistan-China border. The most famous view of it is from a fabulous place called Concordia lying on the confluence of glaciers Baltoro, Vigne and K2. Nanga Parbat is also called Naked Mountain. Its altitude is 8125 m / 26657 ft. It is a mountain with a number of interesting facts. With its massif ends the highest mountain range of the world, the Himalayas. Behind the Indus, which passes by it, lies the Karakoram to the north and Hindu Kush to the east. Nanga Parbat with K2 is included among the most dangerous mountains in the world. The famous southern Rupal face is 4.6 kilometers high. Its surroundings are very interesting for hiking. People enjoy meeting this mountain.

"Great things are done when men and mountains meet."

(William Blake)

Gasherbrum-I is also called Hidden Peak or K5. Its altitude is 8080 m / 26509 ft and is the eleventh highest mountain in the world. Its nickname, Hidden Peak, was given for its remoteness. Its most beautiful view is from the base camp of the Abruzzi glacier. Broad Peak is also called Monumental Top. Its altitude is 8047 m / 26401 ft. It certainly belongs to the most monumental mountains. It is almost seven kilometers long summit ridge. Similarly as K2 and Broad peak, it is most commonly seen from the fabulous place Concordia. Gasherbrum-II is also called K4. Its altitude is 8035 m / 26362 ft above sea level. It is the 13th highest mountain in the world. Like the slightly higher Gasherbrum-I, it is also a difficult mountain to climb. To conclude, Pakistan is famous for its highest mountains in the world.
