

On the Prowl

Summary:

Sarah Barrel with volunteers bears severe sub zero temperature in search of snow leopard across the Siberian wilderness. On the edge of the world 12 people were sleeping in a nylon tent, which is on the mercy of weather. They are there to get information on snow leopard. Soviet Engineers failed to tame the

there to get information on snow leopard. Soviet Engineers failed to tame the steppe and European explorers either get lost in mountains or become native

or ended up but only snow leopard has manage to survive on this lost world. The volunteers could not know how many snow leopards inhabit the remote mountains of Central Asia. The first photo of snow leopard was not

first photo of snow leopard was not taken until the late of 1970s in Pakistan because it remained hidden and did not encounter people. These animals are as elusive as beautiful. It is known that they range from Tora Bora Mountains in Afghanistan to Pamirs of Tajikistan, from the peaks of Pakistan to the Siberian Altai. It was not easy for the bunch

of American conservationists with little scientific training to gather information on snow leopard. As volunteers climbed high towards the snow line they saw a little vegetation. But at the end of the day they recorded the signs of mammal life. It was not the cuddly side of the conservation work. The temperature varies abruptly between minus 5 to 30. Expedition has become entirely

and GPS position. Tessa says over-grazing by local farmers and poaching threatens not only snow leopard but also their

habitats. He develops a relationship with some farmers and the hope to protect the environment rather than hunt

habitats. He develops a relationship with some farmers and the hope to protect the environment rather than hunt and farm it. This is the possibility that serves to support the enthusiasm of amateur conservationist sitting around the campfire. Their experiences and memories will stay with me forever.

ACTIVITY 12.2

1: What does the headline refer to?

Ans: Headline refers that Sarah Barrel travel to subzero temperature area across the Siberia in research of rare and elusive and endangered species snow leopard and also protect them from being preyed and extined.

2: Which of the following ideas can be inferred from the paragraph the headline and the strap line and are relevant to

2: Which of the following ideas can be inferred from the paragraph the headline and the strap line and are relevant to the topic?

- a) In Siberian, people live in tents.
- b) Very few people live in this area of the world.
- c) The terrain is very unpleasant and dangerous.
- d) You would need a very good reason to go to such a place.

Ans: The terrain is very unpleasant and dangerous.

3: Why do you think the writer chose to begin the article like this?

Ans: The writer chooses to begin her article like this because;

2

1. She wants to attract the reader to the article.

1. She wants to attract the reader to the article.

2. She wants to develop the interest of reader towards the writer.

ACTIVITY 12.2

1: What does the first of the above two paragraph begin with question?

Ans: The writer starts the paragraphs with questions because.

1: What does the first of the above two paragraph begin with question?

Ans: The writer starts the paragraphs with questions because; She wants to develop the interest of reader. She wants to attract the attention of reader. The writer wants to create suspense and curiosity of the reader so that the reader may read the passage with interest.

2: What does the paragraph tell about the purpose of the

2: What does the paragraph tell about the purpose of the expedition?

Ans: The paragraph tells about the expedition that Sarah Barrel travels to the Siberia for the purpose to save the rare and exclusive species of snow leopard which are going to be extinct. This took place to collect the information about the snow leopard.

3: What do these paragraphs add to our knowledge of Siberia?

This took place to collect the information about the snow leopard.

3: What do these paragraphs add to our knowledge of Siberia?

Ans: The paragraph gives the information that the Siberia has the unfavorable temperature but it is very difficult to survive. No one can stay there but the snow leopard has managed to survive there because of the survival capacity.

4: What effect does the final sentence of the second paragraph have on the reader?

Ans: The final sentence leaves an effect on the mind of the reader that Siberia has unfavorable climate to survive only snow leopard had managed to live there because he has the survival capacity and also these climatic conditions are not suitable for humans.

ACTIVITY 12.3:

1: What does each of the following words and expressions from paragraph 1,2 & 3 mean in the context of the passage?

a) Relentlessly

Forever, Steadily, Continuously

b) Feline

Wild cat, leopard

c) Back bone

c) Back bone

Strength, Firmness, Will power

d) Nurturing

Discipline, Development

e) Went native

Accommodative, Native

2: Explain in your own words the purpose of each of the following

2: Explain in your own words the purpose of accommodation?

Ans: The main purpose of accommodation is to save, threatened and endangered snow leopards. That's why the

people are in search of these huge, ambiguous cats like animals. They covered this journey to preserve the snow leopards which were at risk.

3: Explain why the volunteers are tired?

Ans: The volunteers were tired because Siberian climate was not suitable for them. According to them it was so hot in day and was so cold in night. They even did not sleep properly. They were worried about unsuitable and obstruct climate.

4: Why do you think that the first snow leopard was not photographed until the late 1970's?

Ans: The first snow leopard was photographed in 1970's. It did

4: Why do you think that the first snow leopard was not photographed until the late 1970's?

Ans: The first snow leopard was photographed in 1970's. It did not photographed before this age because before 1970's nobody has information or knowledge of this feline and nobody has seen it before. Because they do not have interest of searching something or search of animals.

5: Explain what is meant by phrase "armchair conservationist"?

5: Explain what is meant by phrase "armchair conservationist"?

Ans: To solve the problem of different types to belonging country or religion in a humble way through discussion instead of starting wars and the use of weapons is called "armchair conservation". Actually these types of conservationist save the country and the people of the country from the harm of money, life or anything. The phrase "armchair conservationist" refers to those critics who sit in their drawing rooms or cosy offices rather to trek these snow-capped and lawless lands to find and save this rare beast.

6: Explain what is meant by sentence "This is not the cuddly

life or anything, critics who sit in their drawing rooms or cosy offices rather to trek these snow-capped and lawless lands to find and save this rare beast.

6: Explain what is meant by sentence "This is not the cuddly sight of conservation work"?

Ans: In this, writer shares his feelings and experiences of his journey. He said that his journey was not good in Siberian area.

7: Explain in your own words why sightings of mountain leopards are so rare?

Ans: To find the snow leopard in mountains was very hard because they were very rare and those people do not suffer from such difficulties of journey. They climbed up toward snow line and mountains. It was very hard for them to cover rocky and bumpy bluffs and cliffs. The sighting of mountain leopards are so rare bcz snow leopard ranges long distances and it is also the inhabitant of war areas with lawless situations making volunteers hard to trek.
