

Question 1:

Write a program that prompt the user to enter three values and displays the maximum.

```
Private Sub Command1_Click()  
Dim n1 As Integer, n2 As Integer, n3 As Integer  
IF n1>n2 And n1>n3 THEN  
    Print "Maximum = " & n1  
Elseif n2>n1 And n2>n3 THEN  
    Print "Maximum = " & n2  
Else  
    Print "Maximum = " & n3  
END IF  
End Sub
```

Question 2:

Define Multidimensional Array. Explain
Nested If structure.

Multidimensional Array:

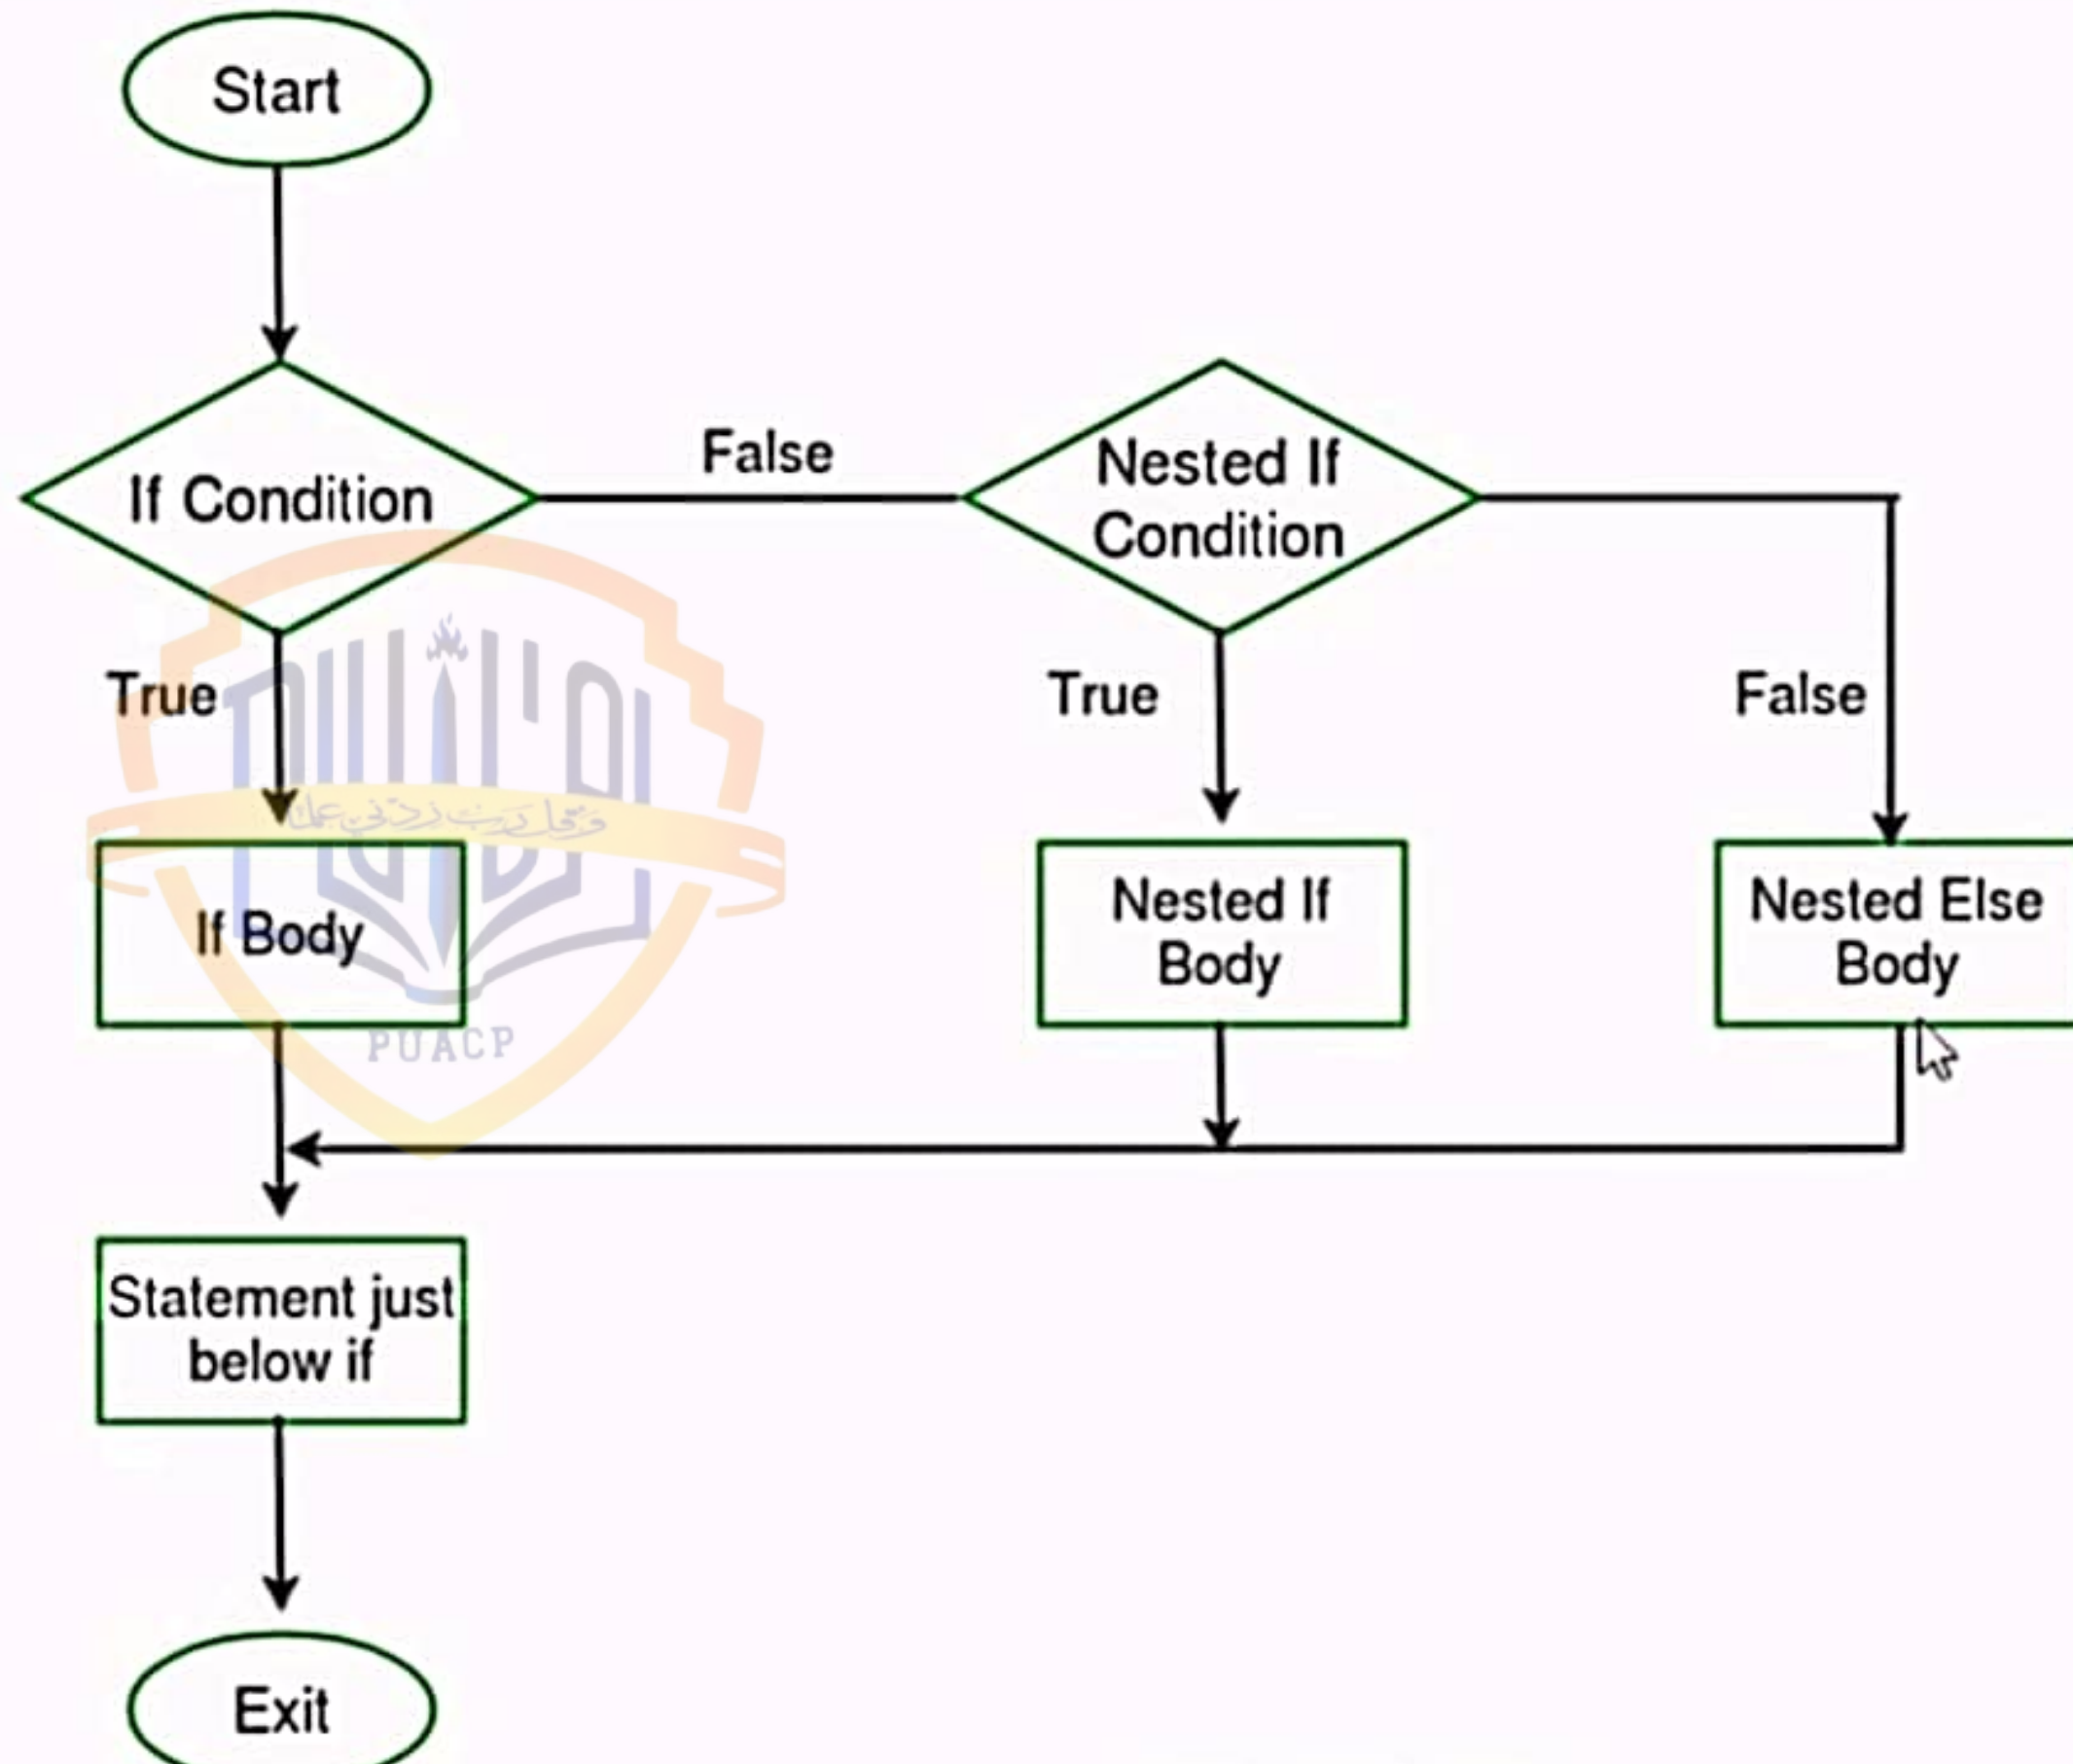

- ✓ In visual basic, a multidimensional array is an array that contains more than one dimension to represent the elements in a tabular format like rows and columns. In visual basic, multidimensional arrays can support either two or three-dimensional series.

Nested IF Structure:

- ✓ An if structure within an if structure is called nested if Structure.
- ✓ The syntax of nested if structure is as follows:

```
IF condition THEN
    IF condition THEN
        Statement(s)
    ELSE
        Statement(s)
    END IF
ELSE
    Statement(s)
END IF
```

Solution

Solution

```
Private Sub Command1_Click()  
Dim Math, English As Integer  
Math = InputBox("Enter marks of math:")  
English = InputBox("Enter marks of english:")  
IF Math >= 80 THEN  
    IF English >= 80 THEN  
        MsgBox("Great")  
    ELSE  
        MsgBox("Good")  
    END IF  
ELSE  
    MsgBox("Good")  
END IF  
End Sub
```

Question 3:

Write a program that gets 10 numbers from the user in an array and display them in ascending order.

Solution

```
Private Sub Command1_Click()  
Dim size As Integer  
size = InputBox("Enter size of array: ")  
Dim Marks(size) As Integer  
FOR i=0 to size  
    Marks(i) = InputBox("Enter Marks: ")  
NEXT  
End Sub
```
